

## **Rome, Valle dei Casali: an intervention for sustainability in a urban and rural landscape**

The area of interest is the portion of land crossed by Affogalasio road, an important axes of penetration through the *Valle dei Casali* - a protected area inside the urban fabric, located in the southwest quadrant of the city 'of Rome. Along Affogalasio road there are some residual valuable agricultural areas, the *Park House*, and many urban activities (sporting clubs, restaurants), production activities and some important buildings including the eighteenth-century *Villa York*.

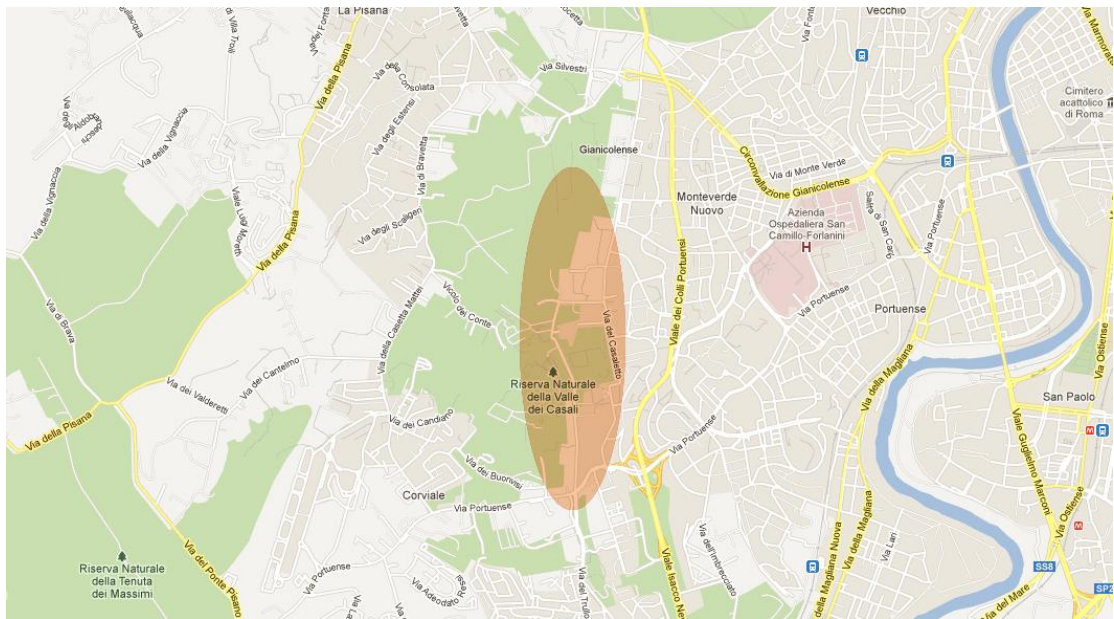

Currently the area and 'characterized by urban disorder and perceptual and especially the difficult accessibility walking and cycling toward the different activities and emergencies. Also along the same name on Affogalasio flowing ditch water collection only partially open, which would require a challenging redevelopment environment. Project proposal of this workshop is aimed at improving the use 'of the Reserve area around Affogalasio road through an integrated action of:

- Strengthening the image identity and' cultural sites;
- Increase the likelihood and the opportunities for enjoyment and perception of the landscape;
- Networking activities and the resources in this portion of territory by a system of practicability' slow
- Promote environmental restoration of the ditch.

We will deal with a complex project that will have to provide for a program of activities for the involvement of citizens in the area.
